

1) What is Ozone ?

A) Ozone is a highly reactive form of oxygen. It is a gas and 3000 times more powerful disinfectant than chlorine.

2) How Ozone is produced?

A) When Air or Oxygen passes from electrical discharge, oxygen atom converts into ozone i.e O_3

3) How to start the machine ?

A) Plug the power cable of machine to the power point. Attach silicon tubing, one end in to machine & attach bubbler (Diffuser) to the other end of silicon tubing. When you switch on the button, Red timer display glows, indicate the power is on..Set the time as per your requirement. From 5 – 30 minutes (by pressing plus button - time will be increase by 5 minutes) auto off timer with machine.

4) Is there timer in the machine?

A) Yes, there is a timer in the machine. From 5 min to 30 min auto stop timer.

5) Is this machine used for water & air purification ?

A) Yes, this machine you can use for water & air purification also.

6) What is Bubbler or Diffuser or air stone?

A) Bubbler or diffuser means a small ball made up of stone. It is used to mix ozone into water. It has a micro holes through which ozone passes & mix with water.

7) What is silicon tubing ? what is it's use ?

A) Silicon tubing means it is like a rubber tubing which is made up of silicon. It is Used to pass ozone gas.

8) How much weight of the machine ?

A)The machine is handy it is like a telephone instrument light in weight, it's weight is 1 kg.

9) Can I mount this machine on the wall ?

A) Yes, you can mount this machine on the wall. The machine is wall mounted.

10) What is the power consumption of this machine?

A) The power consumption of this machine is very low only 20 watt.

11) For disinfection of 5 ltr of water what time to set?

A) For disinfection of 5 ltr water set 5 minutes time.

12) To remove pesticides, insecticides, chemicals from fruits & vegetables what we have to do?

A) For removing pesticides, insecticides, chemicals from fruits & vegetables. Wash them & put them in to stainless steel vessel filled with water. Set the machine for 10 to 20 minutes.

13) How much time should we keep to remove germs, bacteria, hormone, and antibiotics from poultry, meat and fish?

A) For removing germs, bacteria, hormone and antibiotics from poultry, meat and fish, wash them & put them in to stainless steel vessel filled with water. Set the timer for 20 -30 minutes.

14) How many hours effect of ozone will remain in water ?

A) The fishy smell of ozone will be eliminated after 15-20 minutes but effect of ozone will be for 12-24 hrs approximately depending upon the water temperature.

15) Any part we have to change after some time?

A) No Running cost is only electricity & power consumption of this machine is very low.

16) Is any warranty of this machine?

A) Yes, 1 yr warranty of this machine against any manufacturing defect from the date of this machine purchase.
